Overview of food-related activities across programmes

24 May 2019
Overview of the presentation

Objective of the presentation

Provide insights on food-related activities reported on 2018 to inspire the discussion on cross-programme collaboration

Content

1. Objective of the cross-cutting theme
2. Level of reporting on food-related activities
3. Highlights from the data
1. Rationalise and make sense of what different programmes are doing around a topic

2. Leverage the complementary expertise of programmes on the selected topic and foster cross-programme collaboration

3. Aid in communication efforts by helping make SCP more accessible
2018 reporting on food-related activities

Partners in all six programmes implemented activities related to the cross-cutting theme – 156 activities in total

75% RELEVANT TO OTHER PROGRAMMES
2018 reporting on food-related activities

Reporting trends indicate that the implementation of a cross-cutting theme drives increased information sharing and data collection.

- 10% in 2013-2017
- 26% in 2018

**Food-related** vs. **Other topics**
Food-related activities were reported under every indicator, with a significant relevance within some indicators: use of knowledge resources and technical tools, changes in practice, and impacts.
50% of activities were implemented in Africa and Asia/Pacific – programmes have different predominant regions of implementation.

- **Africa**: 29%
- **Asia/Pacific**: 20%
- **Europe**: 17%
- **Central Asia**: 12%
- **Global**: 16%
- **Latin America**: 12%
- **Caribbean**: 3%
- **Online activity**: 3%
- **North America**: 1%
Programmes and food themes

- Sustainable diets: 24%
- Resilient, inclusive, diverse food production systems: 22%
- Reduction of food losses and waste: 22%
- Sustainability along all food value chains: 21%
- Local, national, regional multi-stakeholder platforms: 11%

Programmes and food themes
What you need to know

1. The cross-cutting theme is driving data collection – importantly at the outcome level
   - Increased number of food activities
   - Relevant within outcome level indicators
   - Food waste - STP

2. Data indicates some complementarity between the programmes
   - Different predominant regions of implementation
   - Activities around different food themes
   - Different types of lead organizations

3. The pilot implementation of the cross-cutting theme suggests that this is a two-tier process
   - A reporting cycle is used to engage partners, collect, and analyse data
   - Establish cross-programme collaborations
