One planet
procure with care

Developing the new Strategic Plan 2019-2022

- An **inclusive consultative process**, aiming at broad engagement of the partners of the SPP programme within this process;
- Informed by **comprehensive stock-taking** of the 10YFP/SPP programme at mid-term

The transition phase:

- **Opportunity to assess** the Programme's strategic direction and **align** with the overarching One Planet Network strategy for 2018-2022 the "One Plan for One Planet".
- **Consider lessons learnt** from previous period for enhancing the relevance and operational effectiveness of the Programme
- **Revisit the vision, goal, objectives and scope of work** of the Programme

Appointment of co-leads/Coordination Desk

Process and timeline

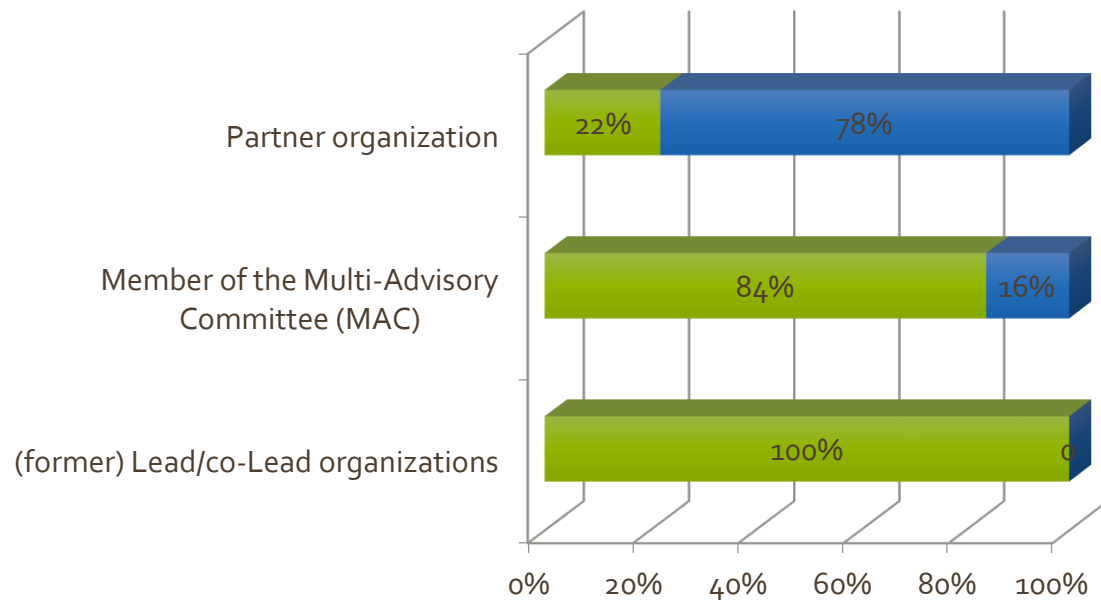

Kick-off of consultations	18 October 2018 (webinar)
Online survey	22 Oct. 2018 – 09 Nov. 2018
Reporting of initiatives	22 Oct. 2018 – 09 Nov. 2018
Bilateral consultations	October – December 2018
Identification of interest areas and volunteering of partners to join task teams for conceptualisation	December 2018
Conceptualization of Interest groups	11 January – 17 February 2019
Strategic development workshop	19-20 February 2019
Strategic plan in-place	01 March 2019

1st part of consultations

2nd part of consultations

45 MAC/partners participated to on-going consultations (survey or/and bilateral calls).

Network engagement

Key Findings of Consultations

Stock-taking and recommendations

Benefits and satisfaction levels

Evaluating Programme meeting its objectives:

1. Build the case of SPP

Weighted average: 5.5

2. Support the implementation of SPP on the ground

Weighted average: 4.7

Most reported benefits:

• Gained visibility about its work and achievements	24%
• Increased contacts/expanded its network	23%
• Gained knowledge and access to information/tools about SPP policy development and implementation	20%

• Accessed collaboration opportunities which would not otherwise have been accessed	11%
• My organisation has not yet benefitted from its participation to the SPP Programme	7%
• Received technical assistance through the programme's network	6%
• Accessed funding or/and information about funding opportunities	5%
• Other (please specify)	3%
• Replicated or scaled-up projects from other partners	1%
• Managed a shift to its own procurement operations which could be also attributed to the membership to the Programme	0%

Recommendations for improvement

Enhance purchasers presence

- Focus on getting purchasers on the network and connecting them for experience sharing

Networking and synergies

- Match-making and facilitation of connection between partners (searchable contacts by interest area).
- Promote coordination across multiple stakeholders and parallel relevant initiatives.
- Link the One Planet SPP work to national and regional/EU actions to create wider commitment

Benefits to members

- Offer clear value to those participating, especially purchasers => platform offers specific answers to challenges (e.g product- or sector-specific, or in a topic area or geography)
- Address the geographic/language barrier;

Communication and engagement

- More opportunities to exchange and connect with the programme.
- Focused, targeted and frequent communication;
- Face to face intermittent;
- Provide clarity on ways partners can engage with the programme;
- Targeted coordination meetings and webinars allowing for exchange and brainstorming

Support SPP implementation

- Shift focus on supporting organizations wishing to implement SPP;
- Respond to needs with concrete actions which will facilitate fund-raising;

Strong leadership

- Facilitate a strong co-leading arrangement with resources for coordinating activities in order for the programme to meet its potential;
- Operating under a clear workplan, with concrete projects and clear targets and reporting on progress

Challenges/Needs/Opportunities for Implementing SPP

01

Political will and leadership

- Awareness-raising;
- Tools for quantification of SPP impacts (environmental/social gains, cost savings, links to SGDs, etc.) => making the case for SPP value + account for gains at the close of a contract;
- Enhance inter-ministerial cooperation (e.g. Ministry of Finance, Economy or Industry, etc.) to address SPP.

02

Capacities

- Coordinated and structured training/ToT and capacity building activities;
- Enhance experience and good practice examples sharing.

04

Setting global standards

- Development of metrics/measurement/reporting and indicators frameworks commonly accepted and used;
- Link One Planet SPP and establish dialogue/synergies with national and regional/EU actions to create wider commitment.

03

Tools and guidance

- Consult with members/procurement authorities on their concrete tool/guidance needs, by sector;
- identify existing tools, classify them and make them accessible;
- Translate guidance/tools into e-learning modules;
- Create a pool of examples of SPP language/requirements used as part of tender process for different major spend categories (IT, healthcare, Cleaning, Infrastructure/Buildings, etc.)

Challenges/Needs/Opportunities for Implementing SPP

05

Price/availability of sustainable products

- Broadening the use of TCO and Life cycle costing/help develop calculators for LCC;
- increase the demand signal of greener products by pooling together multiple purchasing entities (both private and public purchasing organizations) and ensure they align procurement criteria and means of verification;
- Support suppliers in understanding SP and offering sustainable products/services.

06

Monitoring SPP & supply chain performance

- Build joint systems for monitoring suppliers environmental/social claims (global supply chains and share the same suppliers)
- Promote the use of sustainability within supply chains/address need for (supplier) company performance in line with legal framework.

07

Support in-country SPP implementation according to needs

- Knowledge transfer AND pilot projects => enable partnerships (concrete pilot projects) between organisations with knowledge and practical expertise and governments in developing countries with no experience/knowledge. This also entails that funding sources for these projects should be identified;
- Provide platforms where individual purchasing programs can join with others to create a larger demand.

08

Engaging with industry/suppliers

- Establish dialogue and engage with the industry/private sector
- Build awareness, knowledge and capacitate the private sector in sustainable processes and products/services

Focus-themes/Interest Groups Identified

Consultations among SPP programme partners revealed a number of theme areas which appear to constitute an opportunity for the programme to focus on during the coming period.

THANK YOU!

For your time & attention
