Developing the strategic plan of the 10YFP SPP Programme

Recap on consultations
Developing the new Strategic Plan 2019-2022

- An **inclusive consultative process**, aiming at broad engagement of the partners of the SPP programme within this process;
- Informed by **comprehensive stock-taking** of the 10YFP/SPP programme at mid-term

The transition phase:

- **Opportunity to assess** the Programme’s strategic direction and **align** with the overarching One Planet Network strategy for 2018-2022 the “One Plan for One Planet”.
- **Consider lessons learnt** from previous period for enhancing the relevance and operational effectiveness of the Programme
- **Revisit the vision, goal, objectives and scope of work** of the Programme

**1st part of consultations**

**2nd part of consultations**
45 MAC/partners participated to on-going consultations (survey or/and bilateral calls).

Network engagement:
- Partner organization: 22% Engaged, 78% Not engaged
- Member of the Multi-Advisory Committee (MAC): 84% Engaged, 16% Not engaged
- (former) Lead/co-Lead organizations: 100% Engaged, 0% Not engaged

Type of Stakeholder Group:
- UN /Other IO / Network: 34%
- National government: 38%
- Civil society organisation: 13%
- Business sector: 13%
- Expert: 2%

Key Findings of Consultations
Stock-taking and recommendations
Benefits and satisfaction levels

Evaluating Programme meeting its objectives:

1. Build the case of SPP
   - Weighted average: 5.5

2. Support the implementation of SPP on the ground
   - Weighted average: 4.7

Most reported benefits:

- Gained visibility about its work and achievements: 24%
- Increased contacts/expanded its network: 23%
- Gained knowledge and access to information/tools about SPP policy development and implementation: 20%

Evaluating Programme meeting its objectives:

- Accessed collaboration opportunities which would not otherwise have been accessed: 11%
- My organisation has not yet benefitted from its participation to the SPP Programme: 7%
- Received technical assistance through the programme’s network: 6%
- Accessed funding or/and information about funding opportunities: 5%
- Other (please specify): 3%
- Replicated or scaled-up projects from other partners: 1%
- Managed a shift to its own procurement operations which could be also attributed to the membership to the Programme: 0%
Recommendations for improvement

**Enhance purchasers presence**
- Focus on getting purchasers on the network and connecting them for experience sharing

**Networking and synergies**
- Match-making and facilitation of connection between partners (searchable contacts by interest area).
- Promote coordination across multiple stakeholders and parallel relevant initiatives.
- Link the One Planet SPP work to national and regional/EU actions to create wider commitment

**Benefits to members**
- Offer clear value to those participating, especially purchasers => platform offers specific answers to challenges (e.g. product- or sector-specific, or in a topic area or geography)
- Address the geographic/language barrier;

**Communication and engagement**
- More opportunities to exchange and connect with the programme.
- Focused, targeted and frequent communication;
- Face to face intermittent;
- Provide clarity on ways partners can engage with the programme;
- Targeted coordination meetings and webinars allowing for exchange and brainstorming

**Support SPP implementation**
- Shift focus on supporting organizations wishing to implement SPP;
- Respond to needs with concrete actions which will facilitate fund-raising;

**Strong leadership**
- Facilitate a strong co-leading arrangement with resources for coordinating activities in order for the programme to meet its potential;
- Operating under a clear workplan, with concrete projects and clear targets and reporting on progress
Challenges/Needs/Opportunities for Implementing SPP

01 Political will and leadership
- Awareness-raising;
- Tools for quantification of SPP impacts (environmental/social gains, cost savings, links to SGD, etc.) => making the case for SPP value + account for gains at the close of a contract;
- Enhance inter-ministerial cooperation (e.g. Ministry of Finance, Economy or Industry, etc.) to address SPP.

02 Capacities
- Coordinated and structured training/ToT and capacity building activities;
- Enhance experience and good practice examples sharing.

03 Tools and guidance
- Consult with members/procurement authorities on their concrete tool/guidance needs, by sector;
- Identify existing tools, classify them and make them accessible;
- Translate guidance/tools into e-learning modules;
- Create a pool of examples of SPP language/requirements used as part of tender process for different major spend categories (IT, healthcare, Cleaning, Infrastructure/Buildings, etc.)

04 Setting global standards
- Development of metrics/measurement/reporting and indicators frameworks commonly accepted and used;
- Link One Planet SPP and establish dialogue/synergies with national and regional/EU actions to create wider commitment.
Challenges/Needs/Opportunities for Implementing SPP

05 Price/availability of sustainable products
- Broadening the use of TCO and Life cycle costing/help develop calculators for LCC;
- Increase the demand signal of greener products by pooling together multiple purchasing entities (both private and public purchasing organizations) and ensure they align procurement criteria and means of verification;
- Support suppliers in understanding SP and offering sustainable products/services.

06 Monitoring SPP & supply chain performance
- Build joint systems for monitoring suppliers environmental/social claims (global supply chains and share the same suppliers);
- Promote the use of sustainability within supply chains/address need for (supplier) company performance in line with legal framework.

07 Engaging with industry/suppliers
- Establish dialogue and engage with the industry/private sector;
- Build awareness, knowledge and capacitate the private sector in sustainable processes and products/services.

08 Support in-country SPP implementation according to needs
- Knowledge transfer AND pilot projects => enable partnerships (concrete pilot projects) between organisations with knowledge and practical expertise and governments in developing countries with no experience/knowledge. This also entails that funding sources for these projects should be identified;
- Provide platforms where individual purchasing programs can join with others to create a larger demand.
Consultations among SPP programme partners revealed a number of theme areas which appear to constitute an opportunity for the programme to focus on during the coming period.

<th>INTEREST GROUP 2</th>
<th>INTEREST GROUP 3</th>
<th>INTEREST GROUP 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>Facilitate the application of knowledge/tools and support streamlining of sustainable procurement in organizational policies and implementation practices</td>
<td>Track, monitor progress and report on SPP implementation</td>
<td>Address constraints &amp; drive the market towards sustainable solutions and improved sustainability performance</td>
<td>Build the case for sustainable procurement by demonstrating its impact and link to high-level commitments of the 2030 Agenda/Climate Change Agenda/Urban Agenda</td>
</tr>
</tbody>
</table>

**FOCUS SECTORS**

- ICT
- HEALTHCARE
- CONSTRUCTION/INFRASTRUCTURE
- OTHER (e.g. Food, Textiles, etc.)

**CROSS-CUTTING THEMES**

- Resource efficiency (material use efficiency, waste reduction, water/energy use efficiency)
- Environmental impacts (climate change, pollution, biodiversity and sustainable land-use)
- Human well-being (gender, human rights, decent work, health, etc.)
- Circularity
THANK YOU!

For your time & attention
