ANNEX I: PROGRAMME STRUCTURES AND ACHIEVEMENTS 2012-2017

A. Consumer information

Programme	Consumer Information Programme (CI-SCP)
Launched	July 2014
Leads/Co-Leads	Government of Germany, Government of Indonesia, Consumers International
Multi-stakeholder Advisory Committee	20 members
Total partners	90
Programme description	
The programme serves as a global platform to support the provision of quality information on goods and services and the identification and implementation of the most effective strategies to engage consumers in sustainable consumption. It empowers and raises the profile of relevant policies, strategies, projects and partnerships, building synergies and cooperation between different stakeholders to leverage resources towards mutual goals.	
Work areas/Focus themes	
1) Improve availability, accesibility and quality of consumer information; 2) drive change in business and government; and 3) enhance communication to drive behavioural change.	
Key accomplishments at 10YFP mid-term	
At the launch of the programme, the lack of international guidance and agreement around consumer information was identified as the key challenge to be addressed. Accordingly, the key priority over the first years was to address this, and a truly multi-stakeholder and collaborative achievement of the CI-SCP was the launch of the Guidelines for Providing Product Sustainability Information in 2017, the culmination of over two years' drafting and stakeholder consultation, with over 140 institutions contributing. The Guidelines were cited in a resolution at UNEA-3 in December 2017, and their road testing with companies and standard-setting organizations began. 4 working groups have allowed progress and stakeholder collaboration on priority issues under the CI-SCP, in addition to the Guidelines these cover social impact communication, eco-labelling, and sustainable public procurement and labels/ sustainability standards (jointly with the SPP programme). The CI-SCP has further focused on the issue of product lifetime extension and circular economy, and the role of consumers in this agenda. The programme's portfolio at mid-term also includes consumer surveys to inform country level activities, national governments' action plans, policies and strategies, eco-labelling initiatives, communications campaigns and training workshops, as well as business and industry commitments, all ultimately working towards making sustainability the easier choice for consumers.	
Reporting results of programme network at 10YFP mid-term	
1.1 Projects supporting SCP	**6** projects
1.2 Financing the shift to SCP	**6,099,937 USD** in project budgets reported by partners
1.3 Training for SCP	**10** trainings **1,136** person-days of training

2.1 SCP Network	**90** partners
2.2 Outreach and communication activities for SCP	**30** communications and outreach activities
2.3 Production of knowledge and technical tools	**32** resources/tools
3.1 SCP in policy instruments (# of gov./org.)	**9** policies/policy instruments **180** governments/organisations implementing policies/policy instruments
3.2 SCP monitoring and reporting (# of gov./org.)	**4** monitoring instruments **31** government/organisation implementing monitoring instruments
3.3 Education on SCP	**1** SCP integrations into formal education **1** countries integating SCP into education
3.4 SCP changes in practices	**10** changes in practices **47** governments/organisations implementing the changes in practices
3.5 SCP commitments	**203** high-level commitments
3.6 Coordination on SCP	**4** coordination mechanisms
3.7 Use of knowledge and technical tools	**51,007** downloads and/or other quanitifications of use

B. Sustainable buildings and construction

Programme	Sustainable Buildings and Construction Programme (SBC)
Launched	April 2015
Leads/Co-Leads	Finland, UN Environment, Royal Melbourne Institute of Technology (RMIT)
Multi-stakeholder Advisory Committee	19 members
Total partners	52
Programme description	

The programme aims at improving the knowledge of sustainable construction and to support and mainstream sustainable building solutions, to ensure that all stakeholders involved in the planning, commissioning, design, construction, use, management and decomissioning of buildings have a common understanding of sustainable buildings and the knowledge, resources and incentives required to create, maintain and use them. The programme facilitates the sharing of good practices, launch implementation projects, creates cooperation networks, and commits actors around the world to sustainable construction.

Work areas/Focus themes

1) establish, promote and enable conditions for sustainable building and construction policies;
2) support and promote sustainable housing;
3) enhance sustainability in the building supply chain; and
4) reduce climate impacts and strengthen climate resilience of the building and construction sector.
5) facilitate knowledge sharing, outreach and awareness raising

Key accomplishments at 10YFP mid-term

During its first phase (2015-2016) the programme focused on establishing its administrative framework and communication infrastructure, initiating its Trust Fund projects, preparing project proposals to donors, and attending major relevant events within buildings and construction to raise awareness and collecte stakeholder feedback.

Currently in its second phase (2017-2018), the programme has focused on the re-organisation of its MAC, the implementation of its Trust Fund projects, the attendance and the promotion of the programme at major events, and the engagement of its partners within the focus area of circular economy. In addition, the programme has chaired both the monitoring and evaluation task force and the strategy task force of the One Planet network.

Reporting results of programme network at 10YFP mid-term	
1.1 Projects supporting SCP	**33** projects
1.2 Financing the shift to SCP	**24,190,555 USD** in project budgets reported by partners
1.3 Training for SCP	**37** trainings **5,591** person-days of training
2.1 SCP Network	**52** partners
2.2 Outreach and communication activities for SCP	**161** communications and outreach activities
2.3 Production of knowledge and technical tools	**45** resources/tools

3.1 SCP in policy instruments (# of gov./org.)	**10** policies/policy instruments **56** governments/organisations implementing policies/policy instruments
3.2 SCP monitoring and reporting (# of gov./org.)	**0** monitoring instruments **0** governments/organisations implementing monitoring instruments
3.3 Education on SCP	**3** SCP integrations into formal education **16** countries integating SCP into education
3.4 SCP changes in practices	**7** changes in practices **4** governments/organisations implementing the changes in practices
3.5 SCP commitments	**1** high-level commitments
3.6 Coordination on SCP	**6** coordination mechanisms
3.7 Use of knowledge and technical tools	**50,882** downloads and/or other quanitifications of use

C. Sustainable food systems

Programme	Sustainable Food Systems Programme (SFS)
Launched	October 2015
Leads/Co-Leads	Federal Office for Agriculture (Switzerland), the Department of Trade and Industry (South Africa), Hivos,WWF
Multi-stakeholder Advisory Committee	23 members
Total partners	143

Programme description

The programme promotes a systems-based approach, which incorporates considerations to address global challenges through interventions addressing production as well as, and through to, consumption. The holistic perspective that the programme promotes, and the fact that its main objectives relate to awareness raising, capacity building and technical assistance, fostering enabling environments, and ensuring collaboration and partnerships across its network, positions the programme to contribute to the mainstreaming of SCP within food systems.

Work areas/Focus themes

1) sustainable diets;
2) sustainability along all food value chains;
3) reduction of food losses and waste;
4) local, national, regional multi-stakeholder platforms; and
5) resilient, inclusive, diverse food production systems.

Key accomplishments at 10YFP mid-term

The programme has seen substantial progress since its launch, with regards to building the necessary structures to make the programme operational, including: approving and kicking off eight "core initiatives", the principal projects of the programme, expanding the portfolio of activtities; ensuring progress of such projects; and bridging collaboration and multi-stakeholder dialogue both among its partners. Between 2016 and 2017 the programme succeeded in securing 22 additional "affiliated projects" of which all are presented online as part of the programme portfolio.

The programme organized its 1st Global Conference hosted by DTI South Africa (co-lead), and organized by a committee formed by Switzerland, South Africa, Costa Rica, USDA, Hivos, WWF, UN Environment, and FAO, with financial support of Nestlé, and with contributions by various programme actors and external organizations. More than 130 organizations participated in the conference, which included a series of learning journeys in the conference program as well as a "Taste of Waste" dinner event with rescued food served by famed chefs. During the conference, portfolio projects and activities of the programme were presented; external organizations (global, regional and national) also showcased their relevant activities or opportunities (UN-GEF, IFAD, IPES-Food, ADB, etc.), and the selected Trust Fund projects were presented. A remarkable achievement was the resolution (the Pretoria Resolution) issued at the end of the conference and signed by its organizing committee, which expressed the conference's conclusions and call for action

The programme has been active in the pooling of its partners' resources, including through its core initiatives, contributions to external fora and events, as well as by promoting the establishment of an FAO-UNEP interagency umbrella programme in support of the programme.

Reporting results of programme network at 10YFP mid-term	
1.1 Projects supporting SCP	**34** projects
1.2 Financing the shift to SCP	**11,595,697 USD** in project budgets reported by partners
1.3 Training for SCP	**5** trainings **12,596** person-days of training
2.1 SCP Network	**143** partners
2.2 Outreach and communication activities for SCP	**28** communications and outreach activities
2.3 Production of knowledge and technical tools	**7** resources/tools
3.1 SCP in policy instruments (# of gov./org.)	**5** policies/policy instruments **6** governments/organisations implementing policies/policy instruments
3.2 SCP monitoring and reporting (# of gov./org.)	**1** monitoring instruments **1** government/organisation implementing monitoring instruments
3.3 Education on SCP	**3** SCP integrations into formal education **11** countries integating SCP into education
3.4 SCP changes in practices	**0** changes in practices **0** governments/organisations implementing the changes in practices
3.5 SCP commitments	**0** high-level commitments
3.6 Coordination on SCP	**4** coordination mechanisms
3.7 Use of knowledge and technical tools	**1,000** downloads and/or other quanitifications of use

D. Sustainable lifestyles and education

Programme	Sustainable Lifestyles and Education Programme (SLE)
Launched	November 2014
Leads/Co-Leads	Ministry of Environment of Japan, Government of Sweden
Multi-stakeholder Advisory Committee	25 members
Total partners	104
Programme description	

The programme is committed to shaping, upscaling, and promoting sustainable lifestyles and progressive initiatives, through developing and replicating sustainable lifestyles, including low-carbon lifestyles, which is focused on promoting innovative models and traditional practices of sustainable lifestyles, supporting conducive policies, infrastructures and economic instruments, and encouraging responsible market innovation; educating for sustainable lifestyles through mainstreaming of sustainable lifestyles into formal education and learning environments, and empowerment of youth; and by transforming the lifestyles of the current generation and shaping those of future generations through sustainable lifestyle scenarios, frameworks and tools to assess lifestyle impacts, and contributing to global priority challenges.

Work areas/Focus themes

1) developing and replicating sustainable lifestyles, including low-carbon lifestyles, which is focused on promoting innovative models and traditional practices of sustainable lifestyles, supporting conducive policies, infrastructucres and economic instruments, and encouraging responsible market innovation;

2) educating for sustainable lifestyles through mainstreaming of sustainable lifestyles into formal education and learning environments, and empowerment of youth; and

3) transforming the lifestyles of the current generation and shaping those of future generations through sustainable lifestyle scenarios, frameworks and tools to assess lifestyle impacts, and contributing to global priority challenges.

Key accomplishments at 10YFP mid-term

Since its launch in 2014, the programme has established its operating functions and governance structure through the leadership of the Co-leads and Coordination Desk, as well as with support from the Multi-stakeholder Advisory Committee (MAC). Through the involvement of MAC members, the programme has developed multiple initiatives, mobilized external resources, and initiated the on-ground projects in line with the programme's three work areas.

A core achievement of the programme has been the implementation of 19 core projects, including 16 funded by the Ministry of the Environment, Japan.

Reporting results of programme network at 10YFP mid-term	
1.1 Projects supporting SCP	**19** projects
1.2 Financing the shift to SCP	**16,781,715 USD** in project budgets reported by partners
1.3 Training for SCP	**17** trainings **247,166** person-days of training
2.1 SCP Network	**104** partners

2.2 Outreach and communication activities for SCP	**24** communications and outreach activities
2.3 Production of knowledge and technical tools	**9** resources/tools
3.1 SCP in policy instruments (# of gov./org.)	**0** policies/policy instruments **0** governments/organisations implementing policies/policy instruments
3.2 SCP monitoring and reporting (# of gov./org.)	**1** monitoring instrument **2** governments/organisations implementing monitoring instruments
3.3 Education on SCP	**3** SCP integrations into formal education **3** countries integating SCP into education
3.4 SCP changes in practices	**1** change in practice **1** government/organisation implementing the change in practice
3.5 SCP commitments	**5** high-level commitments
3.6 Coordination on SCP	**2** coordination mechanisms
3.7 Use of knowledge and technical tools	**440** downloads and/or other quanitifications of use

E. Sustainable public procurement

Programme	Sustainable Public Procurement Programme (SPP)
Launched	April 2014
Leads/Co-Leads	UN Environment, Korea Environmental Industry and Technology Institute, ICLEI-Local Governments for Sustainability
Multi-stakeholder Advisory Committee	19 members
Total partners	124
Programme description	
The programme aims at building the case for sustainable public procurement (SPP) by improving the knowledge on SPP and its effectiveness as a tool to promote SCP, support greener economies and sustainable development. Furthermore, supporting the implementation of SPP on the ground through increased collaboration and better access to capacity-building tools and support from SPP experts.	
Work areas/Focus themes	
1) assessing implementation and impacts; 2) collaborating with the private sector; 3) identifying obstacles and promoting innovative solutions; 4) implementing sustainable public procurement on the ground.	
Key accomplishments at 10YFP mid-term	
From 2014 to 2017, the programme steadily increased its membership to 124 partners, plus an additional 2500 SPP practitioners and policy makers. The development and dissemination of knowledge resources and technical tools, including policy review reports and capacity building tools	
Reporting results of programme network at 10YFP mid-term	
1.1 Projects supporting SCP	**81** projects
1.2 Financing the shift to SCP	**70,844,616 USD** in project budgets reported by partners
1.3 Training for SCP	**40** trainings **13,266** person-days of training
2.1 SCP Network	**124** partners
2.2 Outreach and communication activities for SCP	**88** communications and outreach activities
2.3 Production of knowledge and technical tools	**210** resources/tools
3.1 SCP in policy instruments (# of gov./org.)	**4** policies/policy instruments **66** governments/organisations implementing policies/policy instruments
3.2 SCP monitoring and reporting (# of gov./org.)	**1** monitoring instrument **1** government/organisation implementing monitoring instruments
3.3 Education on SCP	**0** SCP integrations into formal education **0** countries integating SCP into education
3.4 SCP changes in practices	**4** changes in practices

	45 governments/organisations implementing the changes in practices
3.5 SCP commitments	**0** high-level commitment
3.6 Coordination on SCP	**2** coordination mechanisms
3.7 Use of knowledge and technical tools	**N/A** downloads and/or other quanitifications of use

F. Sustainable tourism

Programme	Sustainable Tourism Programme (STP)
Launched	November 2014
Leads/Co-Leads	World Tourism Organization (UNWTO), Government of France, Government of Morocco, the Republic of Korea
Multi-stakeholder Advisory Committee	22 members
Total partners	150
Programme description	

The programme envisions a tourism sector that has globally adopted SCP practices resulting in enhanced environmental and social outcomes and improved economic performance. Its mission is to catalyze a transformation for sustainability, through evidence-based decision making, efficiency, innovation, collaboration among stakeholders, monitoring and the adoption of a life-cycle approach for continuous improvement. Through the development and implementation of activities, projects and good practices in resource efficient and low-carbon tourism, the programme steers the tourism sector towards enhanced sustainability by reducing the loss of biodiversity, preserving ecosystems and cultural heritage, while advancing poverty alleviation and sustainable livelihood.

Work areas/Focus themes

1) Integrating sustainable consumption and production (SCP) patterns in tourism related policies and frameworks;
2) Promoting collaboration among stakeholders for the improvement of the tourism sector's SCP performance – including the application of monitoring frameworks;
3) Fostering the application of guidelines, tools and technical solutions to mainstream SCP for destinations, enterprises and tourists; and
4) Enhancing sustainable tourism investment and financing

Key accomplishments at 10YFP mid-term

Since its launch, the programme has grown continuously in membership and currently involves 150 partners[1] committed to accelerate SCP in the tourism sector. Additionally, through the tourism networks that are actively engaged, the programme reaches an additional 400 organizations. The programme offers its full membership the opportunity to meet in person once a year, through the organization the International Symposium and Annual Conference.

During its three years of operation the programme has progressively translated its thematic priorities, as defined in the its concept note, into streamlined core activities to generate added value for its partners, as follows: a) Advocacy materials that raise the visibility of the efforts of network members such as the Annual Magazine or the Calendar of Events; b) Knowledge sharing opportunities through the participation of members in public fora and the organization of webinars on topics such as climate change, SMEs or tourism planning; c) Technical support for the organization of events and the implementation of projects; and d) Piloting, since 2015, the Portfolio of Work as a tool for network partners to be able to aggregate their efforts towards a shared goal and includes actitities such as the Conference on Sustainable Tourism in SIDS held in the Seychelles (SSTF); trainings on sustainable practices by GSTC and PATA involving Asian countries and businesses; publications such as the Handbook "Destination: a circular tourism economy" for South Baltic countries (CRT); and

---

[1] List of partners contributing to the mid-term reporting process (2012-2017)

tools like the Business Optimizer targeting French SMEs (CCI); projects such as My Green Butler piloting in United Arab Emirates among other destinations (ICRT) or Tourism Tracer in Australia (University of Tasmania); monitoring instruments such as the Indicators of the Sustainable Tourism Zone of the Greater Caribbean (ACS) or commitments like the ITP Goals for the hotel industry.

Reporting results of programme network at 10YFP mid-term	
1.1 Projects supporting SCP	**66** projects
1.2 Financing the shift to SCP	**70,844,616 USD** in project budgets reported by partners
1.3 Training for SCP	**72** trainings **20,500** person-days of training
2.1 SCP Network	**150** partners
2.2 Outreach and communication activities for SCP	**130** communications and outreach activities
2.3 Production of knowledge and technical tools	**71** resources/tools
3.1 SCP in policy instruments (# of gov./org.)	**10** policies/policy instruments **99** governments/organisations implementing policies/policy instruments
3.2 SCP monitoring and reporting (# of gov./org.)	**17** monitoring instruments **95** governments/organisations implementing monitoring instruments
3.3 Education on SCP	**2** SCP integrations into formal education **2** countries integating SCP into education
3.4 SCP changes in practices	**66** changes in practices **226** governments/organisations implementing the changes in practices
