Strategy 2018-2022:
Addressing suggestions received from the network-wide consultation

Inter-Agency Coordination Group

We would like to thank the members of Inter-Agency Coordination Group for their comments to the strategy, which have improved the document as a common approach on the shift to sustainable consumption and production across the One Planet network. The adopted strategy can be found here.

The strategy addressed several recommendations received from organisations across the network, which were discussed in detail at the 3rd meeting of the Strategy Task Force. The report from that meeting is available here. The key improvements to the version of the strategy you have commented on are: 1) Strengthening the links between the strategy and the Indicators of Success; 2) Strengthening the pillar of the strategy on demonstrating impact; 3) Presenting SCP as an approach to address key cross-cutting issues; 4) Clarifying progress measurements by using targets from the Indicators of Success; 5) Addressing financing throughout the strategy, and 6) Raising the level of the ambition of the strategy to become an implementation platform for SDG 12.

Detailed feedback from IACG stakeholders on the language and structure have been integrated to the extent possible throughout the strategy document. In addition, please find below general feedback on the overarching comments.

- **Crosscutting issues**
  - Circular economy was highlighted as a topic that has the potential to trigger a significant shift and could be featured in the strategy as such.
  - As agreed by the strategy task force, circular economy remains included under crosscutting topics under Objective 4.
  - The topic will be further discussed at the Executive Meeting in May.

- **Strengthening the Trust Fund**
  - The proposal to strengthen the Trust Fund is welcomed
  - The Trust Fund will need to be strengthened in order to respond to the Independent External Review and this strategy. This includes providing a certain amount of ambition in the strategy around which the network can rally.
  - The strategy has several supporting considerations with regards to the ambition of the Trust Fund, including: the strategic allocation of financial resources, the delivery mechanism in countries, the UN coordination, the efficiency of fund administration, and the visibility for resource mobilisation.
  - To more fully address the issue of financing, it has been integrated across several sections of the strategy rather than having a stand-alone section. In addition to reference to the Trust Fund under objective 1, this includes:
    - Financing included in the way forward (concluding section of strategy);
    - Mainstreaming SCP in financial institutions programmes under objective 3;
    - Funding catalysed, unlocked or saved through actions supported by the One Planet Network, under objective 2.
