

Strategy 2018-2022:

Addressing suggestions received from the network-wide consultation

Sustainable Buildings and Construction programme

We would like to thank the partners of the Sustainable Buildings and Construction programme for their comments to the strategy, which have improved the document as a common approach on the shift to sustainable consumption and production across the One Planet network. The adopted strategy can be found [here](#).

The strategy addressed several recommendations received from organisations across the network, which were discussed in detail at the 3rd meeting of the Strategy Task Force. The report from that meeting is available [here](#). The key improvements to the version of the strategy you have commented on are: 1) Strengthening the links between the strategy and the Indicators of Success; 2) Strengthening the pillar of the strategy on demonstrating impact; 3) Presenting SCP as an approach to address key cross-cutting issues; 4) Clarifying progress measurements by using targets from the Indicators of Success; 5) Addressing financing throughout the strategy, and 6) Raising the level of the ambition of the strategy to become an implementation platform for SDG 12.

Detailed feedback from SBC stakeholders on the language and structure have been integrated to the extent possible throughout the strategy document. In addition, please find below general feedback on the overarching comments.

- **One Planet network and the 10YFP**

The re-messaging with the use of One Planet Network has been welcomed.

- To address the further clarification requested on the distinction between the 10YFP and the One Planet network, a text box has been added to the introduction of the strategy which highlights the One Planet network as the partnership which has formed to implement the 10 year framework of programmes on sustainable consumption and production and the 10YFP as the commitment made at Rio+20 to accelerate the shift to SCP.
- The 10YFP has not been replaced, and the name, language and mandate of the 10YFP remain unchanged.

- **Stronger links to the existing indicator framework (Indicators of Success)**

Objectives 2 and 3 have been strengthened to fully integrate the Indicators of Success.

- Objective 2 of the strategy is now aligned with the solutions provided rather than focusing only on practices. This would include 10YFP indicators of success on production of knowledge and tools, use of knowledge and tools, trainings, technical assistance, implementation of policies, changes in practices.
- Objective 3 is now aligned with leading and influencing the shift to SCP. This would include 10YFP indicators of success on network, coordination, outreach and communication, commitments.

- **Quantification of Key Performance Indicator (KPI) targets**

There was a request to clarify how several of the targets in the strategy have been quantified.

- To respond to this, monitoring the implementation of the strategy will be undertaken through disaggregated targets of the Indicators of Success. The progress measurement (KPIs) are linked directly to the output, outcome and impact indicators of the Indicators of Success.

- The targets have been defined on the basis of baseline data available from the reporting on the Indicators of Success.

- **Strategy and action**

It has been requested that the link be made clearer between the strategy and the resulting actions

- The Strategy task force made a clear decision very early on in the strategy development process that the strategy would define the priorities -the “what” – but would not define the implementation – the “how and who”.
- To ensure an effective and coordinated implementation each programme, region and group of actors will integrate the strategy into its work plans. A paragraph has been added to this effect in “way forward” section of the strategy. Further to this, the implementation of the strategy will be the focus of the upcoming Executive meeting in May 2018.
