

Strategy 2018-2022:

Addressing suggestions received from the network-wide consultation

Sustainable Food Systems programme

We would like to thank the partners of the Sustainable Food Systems programme for their comments to the strategy, which have improved the document as a common approach on the shift to sustainable consumption and production across the One Planet network. The adopted strategy can be found [here](#).

The strategy addressed several recommendations received from organisations across the network, which were discussed in detail at the 3rd meeting of the Strategy Task Force. The report from that meeting is available [here](#). The key improvements to the version of the strategy you have commented on are: 1) Strengthening the links between the strategy and the Indicators of Success; 2) Strengthening the pillar of the strategy on demonstrating impact; 3) Presenting SCP as an approach to address key cross-cutting issues; 4) Clarifying progress measurements by using targets from the Indicators of Success; 5) Addressing financing throughout the strategy, and 6) Raising the level of the ambition of the strategy to become an implementation platform for SDG 12.

Detailed feedback from SFS stakeholders on the language and structure have been integrated to the extent possible throughout the strategy document. In addition, please find below general feedback on the overarching comments.

- **Focus on SDG 12 and transversal nature of SCP**

- The strategy task force chose to focus on SDG 12 to firmly anchor the strategy in the 2030 Agenda and provide a clear orientation to leverage the strength of the network.
- Target 12.1, calling for the “implementation the 10YFP” provides the mandate and legitimacy for objective 1 of the strategy.
- SCP clearly contributes to the delivery of multiple goals and targets of Agenda 2030. In the case of food systems, of course the contribution to SDG2 is well acknowledged. To address this the entire objective 4 is based on how SCP contributes to other Goals and helps address key environmental and social challenges.
- In the context of the strategy: objective 1 allows us to firmly anchor ourselves in the 2030 agenda, and objective 4 allows us to demonstrate our contribution to other SDGs and to key environmental and social challenges.

- **Addressing the financing of measurable change**

A concern was raised that the strategy places too much expectation on the Trust Fund as the principle means of financing for the shift to SCP.

- The text has been modified so that the Trust Fund is presented as one means to implementing SDG 12 and the strategy.
- In addition, the overarching importance of financing in order to achieve the transformational shift outlined in this strategy is highlighted by integrating it across several sections. In addition to reference to the Trust Fund in Objective 1, this includes:
 - Financing included in the way forward (concluding section of strategy);
 - Mainstreaming SCP in financial institutions programmes under objective 3;
 - Funding catalysed, unlocked or saved through actions supported by the One Planet Network, under objective 2.

- **Quantification of Key Performance Indicator (KPI) targets**

There was a request to clarify how several of the targets in the strategy have been quantified.

- To respond to this, monitoring the implementation of the strategy will be undertaken through disaggregated targets of the Indicators of Success. The progress measurement (KPIs) are linked directly to the output, outcome and impact indicators of the Indicators of Success.
- The targets have been defined on the basis of baseline data available from the reporting on the Indicators of Success.

- **Working across the network for cohesive sustainable consumption and production patterns**

This wording, from Objective 3, raised concern that only working within a designated network might exclude partnerships with other interested stakeholders.

- The wording of Objective 3 has been modified in order to avoid confusion, calling on implementers of the strategy to *“lead the cohesive implementation of sustainable consumption and production”*.
- The word network is not used in this strategy as a means to restrict any interested parties, whose objectives align with the ones in this strategy, to participate in its implementation.
- The following has also been added in the first part of the strategy document: *“The One Planet network is an open partnership, and countries including all relevant stakeholders and organisations in those countries are invited to join and actively engage in the implementation of this strategy. “*
- The strategy is also an outreach document, to engage new organisations (as well as current ones), using simpler and common language.

- **Publicising the One Planet Strategy**

- A request came from WWF to be updated on how the strategy will be published/publicized in order to facilitate potential opportunities to create content to highlight the programmes plan for its implementation.
- Continued collaboration is welcome moving forward with dissemination and promotion of the strategy, including at international forums such as the High Level Political Forum 2018.
