Strategy 2018-2022:
Addressing suggestions received from the network-wide consultation

Sustainable Lifestyles and Education

We would like to thank the partners of the Sustainable Lifestyles and Education programme for their comments to the strategy, which have improved the document as a common approach on the shift to sustainable consumption and production across the One Planet network. The adopted strategy can be found here.

The strategy addressed several recommendations received from organisations across the network, which were discussed in detail at the 3rd meeting of the Strategy Task Force. The report from that meeting is available here. The key improvements to the version of the strategy you have commented on are: 1) Strengthening the links between the strategy and the Indicators of Success; 2) Strengthening the pillar of the strategy on demonstrating impact; 3) Presenting SCP as an approach to address key cross-cutting issues; 4) Clarifying progress measurements by using targets from the Indicators of Success; 5) Addressing financing throughout the strategy, and 6) Raising the level of the ambition of the strategy to become an implementation platform for SDG 12.

Detailed feedback from SLE stakeholders on the language and structure have been integrated to the extent possible throughout the strategy document. In addition, please find below general feedback on the overarching comments.

- **Strengthen the pillar of the strategy on demonstrating impact**
  - Objective 4 has integrated specific references on knowledge, understanding and data on SCP impacts – resource efficiency, environmental impact (greenhouse gas emission, pollution reduction and biodiversity) and human well-being.
  - Text adjusted in the introduction and in the vision statement of the strategy to include the notion of human well-being.

- **Action-oriented objectives**
  - In general the action-oriented nature of the strategy is highlighted, emphasizing the tangible change that the One Planet network aspires to make in countries given the adequate financial resources and shared responsibility of national authorities and programme actors.
  - Specifically, Objectives 2 and 3 have been adjusted to reflect the action oriented focus of the strategy, calling on the network to ‘catalyse ambitious action...’ (rather than simply ‘identify, promote...’) and to ‘lead a cohesive implementation...’ (rather than simply ‘work across the network...’)

- **Going beyond 2022**
  - A reference has been added at the end of the strategy, noting that the objectives and approach of this strategy are closely aligned to the 2030 Sustainable Development Agenda and the achievement of the Sustainable Development Goals.
  - The strategy provides a clear way forward for the next 5 years on the shift to sustainable consumption and production across stakeholders and regions. It defines priorities within the broad mandate of the 10YFP, which address emerging trends and strategic gaps identified and which the diverse strengths of the network can help address.
On the other hand, suggestions received on extending the duration of the 10YFP beyond 2022 have not been included in the strategy, as such a decision would affect the mandate and may require a different process.
