Strategy 2018-2022:
Addressing suggestions received from the network-wide consultation

Sustainable Public Procurement programme

We would like to thank the partners of the Sustainable Public Procurement programme for their comments to the strategy, which have improved the document as a common approach on the shift to sustainable consumption and production across the One Planet network. The adopted strategy can be found here.

The strategy addressed several recommendations received from organisations across the network, which were discussed in detail at the 3rd meeting of the Strategy Task Force. The report from that meeting is available here. The key improvements to the version of the strategy you have commented on are: 1) Strengthening the links between the strategy and the Indicators of Success; 2) Strengthening the pillar of the strategy on demonstrating impact; 3) Presenting SCP as an approach to address key cross-cutting issues; 4) Clarifying progress measurements by using targets from the Indicators of Success; 5) Addressing financing throughout the strategy, and 6) Raising the level of the ambition of the strategy to become an implementation platform for SDG 12.

Detailed feedback from SPP stakeholders on the language and structure have been integrated to the extent possible throughout the strategy document. In addition, please find below general feedback on the overarching comments.

- **Implementation mechanism for SDG 12 at country level**
  - Target 12.1, calling for the “implementation the 10YFP” provides the mandate and legitimacy for objective 1 of the strategy.
  - National focal points are the primary implementation entry points, and the programmes play a role in supporting them to implement their countries’ sustainable consumption and production priorities.
  - As the network is made up of, inter alia, programmes and national focal points, it is important to maintain the terminology ‘implementation mechanism’ when talking about the One Planet network.
  - The SDGs are monitored and measured at country level, and the main reference on the effectiveness of the One Planet network of delivering on the commitment of the 10YFP will be at this level.
